

PRESS RELEASE

Date: March 22, 2013
For Immediate Release

JETNET To Exhibit at 2013 Asian Business Aviation Conference & Exhibition Aviation Intelligence Firm Celebrating 25th Anniversary

UTICA, NY – JETNET LLC, the world leader in aviation market intelligence, will exhibit at ABACE 2013 in Shanghai, China and is celebrating 25 years of delivering professional aircraft research services. JETNET will present their full range of software products and services at the Shanghai Hongqiao International Airport at Shanghai Hawker Pacific Business Aviation Service Centre. This year's ABACE runs April 16th-18th. JETNET will be in booth H214.

JETNET is the leading provider of professional, business, and commercial aviation research services, and has been providing state-of-the-art services since 1988. "We're proud to be celebrating 25 years of serving the aviation industry," said Vincent Esposito, JETNET President. "Every year we're shining a brighter light on the aircraft market, giving industry professionals better ways to grow their businesses. That's kept us growing for a quarter of a century."

Among JETNET's clientele are leading manufacturers, suppliers, and government and advocacy groups for business and commercial aviation worldwide. The company employs a full-time staff of more than 40 research specialists who contact industry professionals around the world each business day. They make real-time updates to the most comprehensive database of its kind. At the close of 2012, JETNET's database held information on more than 18,000 business turboprops, 19,000 business jets, 28,000 helicopters, and 35,000 commercial aircraft, a stunning total of more than 100,000 aircraft.

"At JETNET it's all about reliable information and market intelligence," said Paul Cardarelli, JETNET Director of Sales and Marketing. "Our staff solicits original information from sources directly associated with aircraft. The data they gather is reviewed and confirmed for accuracy and completeness. It's then added to the JETNET database for instantaneous access by our clientele, a network of aviation professionals around the globe."

JETNET gathers comprehensive details on aircraft owners and operators, lessors and lessees, fractional owners, airframe, engine and cabin specifications, transaction histories on aircraft dating back 25 years, and comprehensive market details on aircraft for sale.

The company's flagship product, Evolution Marketplace, combines the vast JETNET aircraft database with its comprehensive global listing of Aircraft For Sale. The software suite features an intuitive and customizable graphical user interface, so subscribers can view charts, tables and selective information, depending on their needs. Their alternative service, Evolution Aerodex, is tailored for FBOs, maintenance shops and other service providers who need timely information on turbine aircraft and their owners and operators worldwide. Aerodex provides the same fleet data and functionality as Evolution Marketplace, without the aircraft for sale component.

JETNET also offers aviation professionals a variety of ancillary services. JETNET's CRM (Customer Relationship Management) service is designed exclusively for aviation professionals—specifically aircraft dealers and brokers, financiers, insurers, FBOs, airport managers and aviation product or service providers. JETNET CRM provides instant access to their entire worldwide database of aircraft, owners and operators, to which users can add and organize their own contact information for an exclusive combined database.

Worldwide leader in aviation market intelligence.

JETNET SPI (Sales Price Index) provides actual selling prices of aircraft, along with averages and statistical information on used retail sale prices of whole aircraft. Information is gathered directly from owners, operators, chief pilots, sellers and purchasers, including sale prices by aircraft category. Users can generate charts and graphs with statistical averages on make, model, year, days on market and more.

Aviation Business Index (ABI) (AviationBusinessIndex.com) is a worldwide portal for aviation information featuring hundreds of aircraft for sale listings from reputable brokers and dealers throughout the world. Visitors to ABI can also navigate through JETNET derived reports and listings for aviation products and services, market reports and lists, aircraft owners and operators, aircraft dealers and brokers, FBOs, aircraft financiers and insurance providers, and industry news and events.

JETNET iQ (Intelligence Quarterly) (JETNETiQ.com) is the firm's members-only business aviation market forecasting and premium advisory service. Produced in partnership with the Rolland Vincent & Associates aviation consultancy of Dallas, TX, JETNET iQ performs insightful surveys of 500 business aircraft owners and operators every quarter. There are three components to JETNET iQ:

JETNET iQ REPORTS, definitive references with state-of-the-industry analyses, customer insights and detailed 10-year delivery and fleet forecasts.

JETNET iQ CONSULTING for customized research and analysis on a project-by-project basis.

JETNET iQ SUMMITS, networking opportunities to learn about emerging developments and interact with other industry thought leaders. The next JETNET iQ global Summit takes place on June 5, 2013 at the W Hotel in New York City. More information is available at JETNETiQ.com.

"Since our founding, we've never rested in improving our products and services," added Esposito. "We look forward to many more years of providing exactly what our subscribers ask for." JETNET is inviting ABACE attendees to learn more about their products and services at booth H214 at this year's show.

For 25 years, JETNET has delivered the most comprehensive and reliable business aircraft research to its exclusive clientele of aviation professionals worldwide. JETNET is the ultimate source for information and intelligence on the worldwide business, commercial, and helicopter aircraft fleet and marketplace, comprised of some 100,000 airframes. Headquartered in its state-of-the-art facility in Utica, NY, JETNET offers comprehensive user-friendly aircraft data via real-time internet access or regular updates.
